

# OUR COUNTRY IS UNDER ATTACK

The independent sovereign country which was Great Britain no longer exists. On 21<sup>st</sup> January 2010 the sixth and final stage of treasonous Lisbon Treaty was ratified reducing Britain to merely the 9<sup>th</sup> State of the EU, controlled by Germany via Brussels.

Question? **Where was the term 'European Economic Community' first used?** In 1941 when it was first realised that Germany may lose the war and their attempt to form the European Union by Force. Hermon Goering addressed the Vansig Conference at Berlin University to determine what form the push for the EEC would take i.e. WW2 would become a covert operation – a secret war, so in 1943 the German Geopolitical Centre was set up in Madrid to orchestrate how people would be sub planted into European Countries to achieve this end, 'the main enemy' being the countries where our inalienable rights are (were) protected by the constitution, thus the focus has been on the destruction on Britain and America, including amongst other things, the destruction of our national identity, culture, heritage and social standards. The final instrument was the signing by the Queen of the Lisbon Treaty (The Queen has committed treason, as she made an oath at the time of her coronation that she would protect us from alien laws.) It only remains now for these draconian Napoleonic laws to be implemented.
